ISSUE PRESENTED

What can a person do if they are constantly attacked with electronic warfare weapons?

AKA Havana Syndrome, Targeted Individual, Gang Stalking, Direct Energy Weapons,

Remote Neural Monitoring, Voice of God (V2K), Active Denial Systems, Bio Effects

STATEMENT OF THE CASE

What would you do if you had access to systems and weapons that no normal human knows about? There are groups that operate territorially nationwide that communicate and collude with each other. They implant people without their knowledge to target and use weapons that are in the non-visible spectrum. There are severe ethical concerns that have already started with Neuro Rights and Bio Ethics. This technology exists whether you want to believe it or not. The main goal is to educate at all levels because the only way to protect each other is to understand the latest in science and technology. The current response is to let people continue to suffer due to ignorance and a lack of compassion. ANYONE who continually gets attacked daily will eventually become a "mind control" victim. Here in the State of Pennsylvania: Stanley Joseph Caterbone and Maurice Martin Price are examples of people who have been victims for several decades. *The Devil's greatest trick is making the world believe he doesn't exist.*

"Espionage is the world's second oldest profession and just as honorable as the first."

§1361. Action to compel an officer of the United States to perform his duty

The district courts shall have original jurisdiction of any action in the nature of mandamus to compel an officer or employee of the United States or any agency thereof to perform a duty owed to the plaintiff

The History of Policing [taken from *Alsaada v. City of Columbus*]

An 1871 *New York Times* article on the history of policing wrote: “The *personnel* of the force is an excellent one, though there are of course some decided exceptions, as in all large bodies of men.”¹ The history of policing in the United States presents, as history is wont to do, uncomfortable truths upon which this Court pauses to reflect.

As the nascent colonies matured, a concerted effort to surveil society’s goings-on developed. Night watches, constables, and sheriffs were a mix of ad hoc vigilante groups and those with more institutional legitimacy.² It was 1631 Boston that created the idea of the so-called Boston Watch (also known as “The Court”, “Town Watch”, and “citizen Watchmen”). These citizen Watchmen were organized as a “military guard” to surveil and punish infractions. Everything from wearing “extravagant boots,” to northeastern Indian tribes engaging in sacred cultural traditions, to infamous accusations of witchcraft, became punishable at the hands of the Town Watch.³ New York followed suit ⁴§227 in 1845, establishing a police force of 800 men.⁵ The recruits were told that “the prevention of crime [was] the most important object.”⁶ And “[b]y the late 1880s, all major U.S. cities had municipal police forces in place.”⁷

In the Antebellum South, formal policing took its earliest form in slave patrols. By 1822, the slave patrol system in South Carolina was 100-members strong.⁸ During the 1830s, New Orleans adopted a militaristic police force to control slaves.⁹ These slave patrols had three primary functions: (1) to chase down, apprehend, and return to their owners, runaway slaves; (2) to provide a form of organized terror to deter slave revolts; and (3) to maintain a form of discipline for slave-workers who were subject to summary justice, outside of the law, if they violated plantation rules.¹⁰

After the Civil War, chattel slavery ended formally, but the legal and economic subjugation of Black Americans endured, as slave codes gave way to Black Codes.¹¹ The two codes were so similar it is a wonder that the copy-and-paste functionality was only invented more recently.¹² Confederate defeat also initiated the convict-lease system—which reified the societal synonymization of blackness with criminality.¹³ Of course, ratification of the Reconstruction Amendments, i.e., the Thirteenth, Fourteenth, and Fifteenth Amendments, did not create *de jure* or *de facto* equity. Rather, Jim Crow laws took the place of the Black Codes—lasting until recently: 1968.¹⁴

In the American West, law officers such as the Texas Rangers committed violence against indigenous persons, Mexicans, and Mexican-Americans in Texas.¹⁵ In California, ¹⁶§228 so-called “vigilance committees” terrorized Chinese immigrants; some such committees acted with legal authority, arresting, trying, and eventually executing people.¹⁷

In the North, the development of policing as we know it today was intimately bound up with the policing of “undesirable” immigrant groups and free or freed Blacks in the swelling cities.¹⁸ In cities like Boston, Chicago, and New York, nineteenth-century police participated in strike-breaking and perpetrated election fraud in the service of political machines of the day.¹⁹

As history books turned from black-and-white to full color, the role of law enforcement in society remained fraught. The organizational structure of police departments grew increasingly dependent on technology such as the two-way radio and surveillance devices. Televisions aired police barring Black students from integrating Little Rock Central High School; they showed that peaceful protests for civil rights were met with police violence and arrests, fire hoses, and dog attacks.²⁰ Riots that erupted after instances of police brutality or discrimination occurred with regularity in American cities during the 1960s.²¹

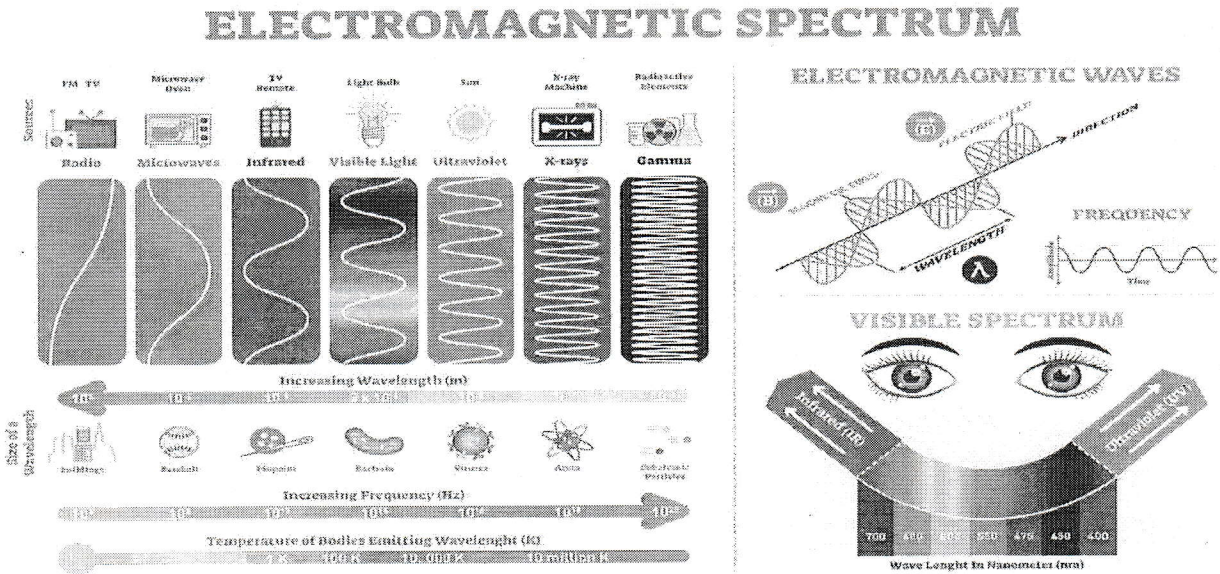

Technology did not just bring the struggle for equity to those seemingly unaffected by injustice. It also thrust officer conduct into scrutiny’s spotlight. The 1985 Philadelphia Police Department bombing targeted a rowhome inhabited by a Black separatist group, killing eleven people and destroying sixty-one homes (a formal municipal apology came just in 2020).²² The brutal police beating of Rodney King in 1991—and the acquittal of police officers on all charges of excessive force—precipitated riots across the United States. The 1993 law-enforcement siege in Waco, Texas, was broadcast live for weeks on end.

That brings us to today. Police occupy an interesting role in our societal consciousness. Children play cops-and-robbers and dream of becoming a police officer when grown. And law enforcement is an ever-present topic in songs,²³ musical theater, ²⁴§229 television,²⁵ and movies.²⁶ Despite a shift toward community policing, new dark chapters have been drafted in this institution’s history books.²⁷ And they continue to be drafted.

“The duty of the Patriot is to protect the people from the government.”

ELECTRONIC WARFARE – WHAT IS IT?

Electromagnetic Spectrum (EM) – if you sense anything that means you are receiving spectrum signals

- The human brain is basically a receiver and interprets the full EM spectrum in various ways
- Visible light (signal) is only a small part of this naturally occurring spectrum (mostly not visible)
- Signals can be generated to bounce more frequently (modulation) by increasing power (energy)
- Electromagnetic waves (cycles of up and down bounces) contain an electric and magnetic field
- Digital signals are just interpreting those up and down signal bounces (0 for down and 1 for up)
- The electromagnetic force governs all chemical processes, which arise from interactions between the electrons of neighboring atoms (the basis for electric power engineering)

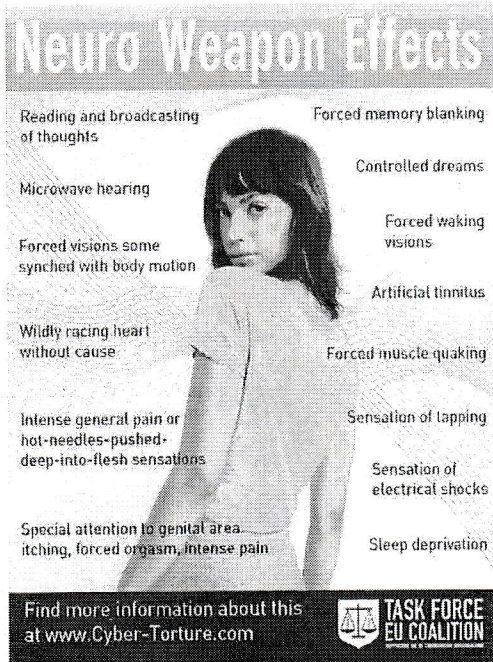

Electronic Warfare¹ (EW) – any action involving the use of the electromagnetic spectrum or directed energy to control the spectrum, attack an enemy, or impede enemy assaults.

- The purpose is to deny (hacking, jamming, spoofing are techniques used)
- An element of Information Warfare (closely linked to Psychological Warfare)
- The more times a signal bounces (frequency) within a given distance (wavelength) determines the effect it will have on the human body (bio effect). 5G frequency has a diameter of a mm.
- The relationship between electric and magnetic fields can induce specific human emotions
- Voltage gated calcium channels from bones can form a path to muscles to force movement
- High frequency signals require a focused beam (beam forming) usually requiring a phased array antenna (like 5GHz WIFI) which doesn't move but electronically gets steered (beam steering).
- Lasers are an example of attacks in the visible spectrum. *You can't see radio and microwaves!*

¹ "Operators of the future will need to understand the fundamental physics of a broad array of interrelated spectrum-dominated technologies to include artificial intelligence, networks, 5G, complex waveforms, Interferometry, antenna design, microelectronics, phase reversing phenomena, digital processing, cloud topologies, metadata analytics, encryption, directed energy, and other forms and modes of electronic warfare."

The United Nations Office of the High Commissioner

The UN is trying to do something about this Electronic Harassment of Microwave Hearing Effect Technology and other-directed Energy Weapons used on American Citizens for Psychological warfare mental torture games.

"Professor Nils Melzer, International Law, holds the Human Rights Chair of International Humanitarian law and Human Rights. Prof. Nils Melzer is on the United Nations as a Chairman. He is starting an investigation into these crimes committed by the government that involve the technology of Microwave Hearing Effect Technology and Cyber Technology to mentally torture and cause severe physical bodily harm done to human beings". (1)

Pro. Melzer and the United Nations are trying to put a stop to these crimes of mental and physical torture with the illegal use of this technology on human beings, without the Consent of the person being mentally tortured by this Crime. These people are mentally torturing VICTIMS with this technology without the actual Consent of the Human Being themselves. It is breaking human rights laws set forth by the United Nations because these people did not get Consent from the person to use this Microwave Hearing Effect Technology on this person. This is breaking major Human Rights Laws.

Cognitive Electronic Warfare (CEW) is the use of cognitive systems – commonly known as Artificial Intelligence (AI) or machine learning – to enhance development and operation of Electronic Warfare (EW) technologies for the defense community.

Cognitive systems can sense, learn, reason, and interact naturally with people and environments, accelerating development and implementation of next generation EW threat detection, suppression, and neutralization technologies.

HUMAN FREE WILL CHEATSHEET

WHO: ANYONE CAN BE A TARGETED INDIVIDUAL [Exhibit 1 has a list and summary of famous victims]

- Typically: People with many social connections or very little; and without the ability to fight back

WHAT: SURVEILLANCE [the real purpose of bulk collection and the business is to blackmail or entrap]

- Remote Neural Monitoring [Edward Snowden explaining: <https://www.youtu.be/ZBSlsLRHCEw>]
 - hardest thing to grasp is the technology that can remotely monitor a person's brain
 - entrainment is syncing your brain waves with a computer interface trained to match it
 - the brain controls all thoughts and senses, so you **NEED TO BE AWARE** of cognitive bias
- Quantum Communications to send and receive information to multiple parties instantaneously
 - quantum computers, quantum networks, superposition, entanglement, string theory
- Enhanced Interrogation Techniques [the torture from Guantanamo Bay now done remotely]
 - Voice of God (v2k) = information gathering, distractions, and to blame someone else
 - Direct Energy Weapons + Bio Effects Weapons = torture for *Trauma Based Mind Control*

WHERE: GANG STALKING HAPPENS IN EVERY COMMUNITY [MK-ULTRA was a social recruiting program]

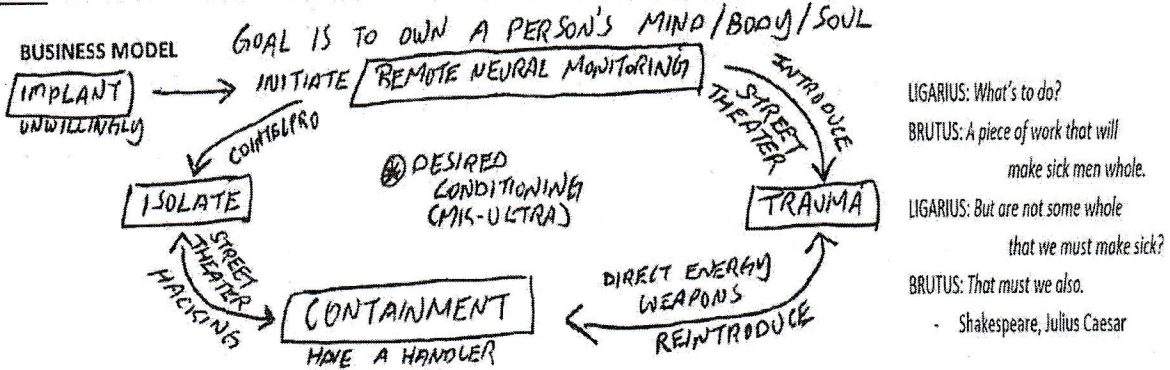

- The whole point of gang stalking is to monitor and create more gang stalkers in each community
- Remote Neural Monitoring is a platform that people use. People that are in these databases are used to monitor the community as a walking and talking bio drone. When people "stare" at people who are victims of gang stalking they are just being monitored and followed. This is very hard to grasp but if this technology exists and you get assaulted with Enhanced Interrogation, you are in the process of turning into one of these walking talking bio drones if no one helps.

Information warfare is the manipulation of information trusted by a target without the target's awareness so that the target will make decisions against their interest but in the interest of the one conducting information warfare.

WHEN: 24/7 365 DAYS A YEAR OF ENHANCED INTERROGATION ANY WHERE AND ANY TIME ON EARTH

- *History of Electronic Warfare & Mind Control Technology* [page 8] tries to condense all human history and the relationship with science and electricity. AFTER WWII is very interesting because those people now rule the world and have been conducting unfettered MK-ULTRA experiments on the general population ever since. Where did all those MK-ULTRA “human experimenters” go after being exposed by the 1975 Church Commission? This community grew!
- New technology pipelines are what these people are using to experiment on the general public
 - If no one knows this technology exists and people are ignorant [even to learning] scumbags with this technology will continue to exploit every community unchecked
 - Science, Technology, Engineering, Math knowledge in the general population is really lacking and these “white collar” scumbags are now using Artificial Intelligence and DNA editing and lessons learned in the past 20 years in Neuroscience to automate bio drones
- The trauma is not just physical, but the psychological aspect is torture in every way because who can you go to? They attack your friends and family and will even attack you in a mental hospital!

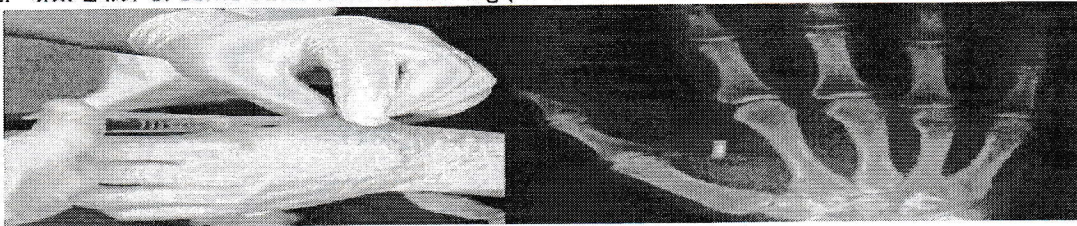

HOW: EXTRAORDINARY RENDITION = MK-ULTRA AS A SERVICE [kidnapping is a forced change in environment]

Technology and techniques will change but basically ANYWAY to get you to disassociate with shared reality

- Information Operations [FAKE NEWS or spreading DISINFORMATION with your social networks]
- Chain Link Analysis [Facebook Connections to find new Targets or follow social connections]
- Doctrine of Plausible Deniability [TO DENY ANY ACCOUNTABILITY for perps and organization]

1. **IMPLANT** or some other form of tracking (MOST WILL NOT KNOW THEY HAVE BEEN IMPLANTED)

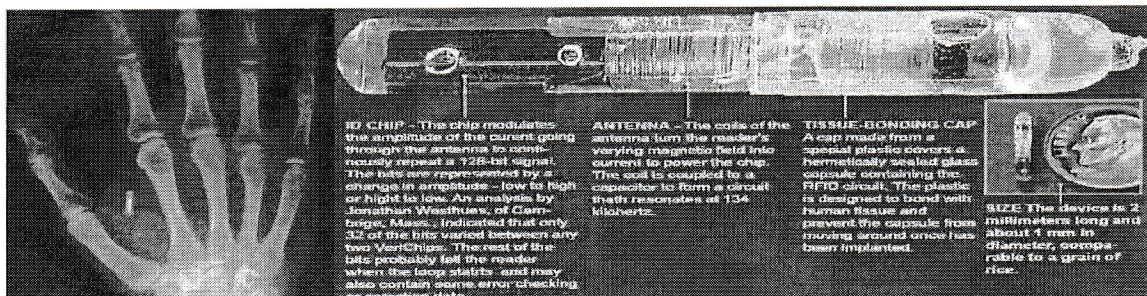

2. **ISOLATE** with COINTELPRO Techniques (damage reputation) and Hacking EVERYTHING electronic
3. Introduce **TRAUMA** with other MK-ULTRA victims or Enhanced Interrogation Techniques
 - Voice of God (v2k) for interrogations and Direct Energy or Bio Effects to torture
4. Gang of Remote Neural Monitors droning MK-ULTRA victims to perform tasks [**STREET THEATER**]
5. **CONTAINMENT** is owning the Target's environment or being fully dependent on the perpetrator

I, Matthew Day, hereby swear under the pains and penalty of perjury that the following statements are true and correct:

STATEMENT OF FACTS

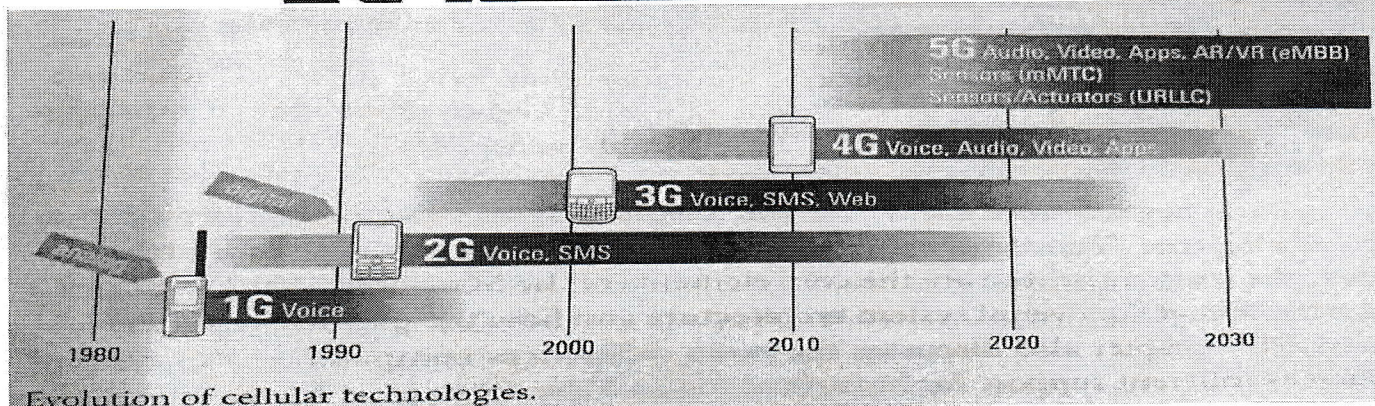

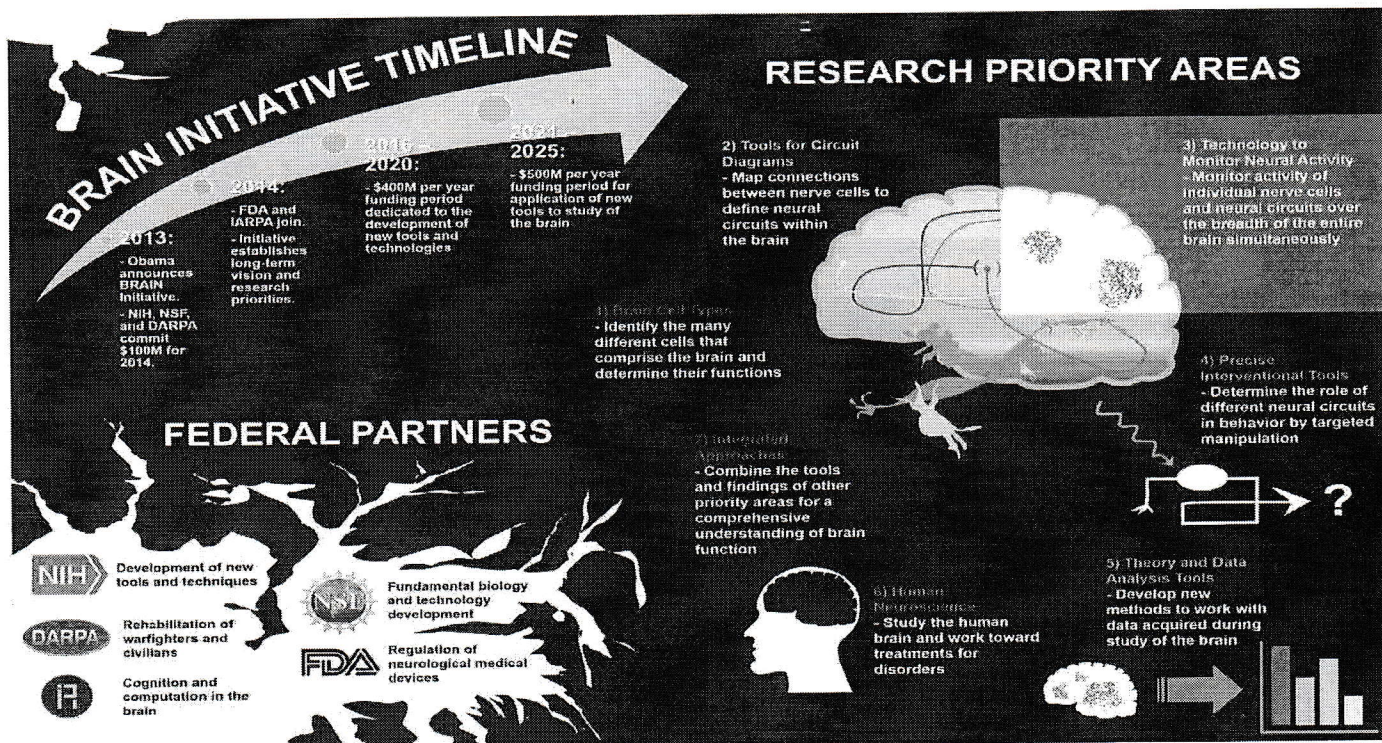

1. Human Free Will is a 501(c)(3) Non-Profit that helps people with technical issues. We are Targeted Individuals that have issues with the public infrastructure such as phone and internet service. Our mail and packages also tend to get rerouted or come days late. This is a form of covert repression.
2. My name is Matthew Day and I am a Targeted Individual and a victim of gang stalking. Ever since I left the military in 2005 there have been events in my life that one would call covert electronic harassment; but at the time I just shrugged them off as bad luck because I was unaware of the existence of this technology. Most people don't know about this technology or how it shapes daily current events. Once you go down this rabbit hole you realize how much of an impact this community has shaped the course of modern human history. [next page is a detailed timeline]
3. Early 2019, while living in Baltimore, Maryland; out of the blue one day I started to get attacked with direct energy and bio effects weapons which now is called Havana Syndrome. The first month I was attacked nonstop day and night. Imagine being attacked with something you can't see, and this thing is keeping you up and when you go to sleep it also wakes you up every hour or so. Within the first week I began to develop electromagnetic hypersensitivity due to the constant full spectrum attacks. All forms of electronic communications also get hacked or diverted. This technology is used on people in your vicinity. The main goal is to isolate you so they can control your environment and situation. If you are **woke**, they make you look crazy to continue to torment and play games because there is **NO ONE OR ANYWHERE YOU CAN GO TO FOR RELIEF!!!**
4. At the time I was 37 and while I was getting heavily attacked on a daily basis, I also started to get electronic voice of god (v2k) communications. I learned not to tell people what I go through and this form of communication is well documented but not well known. People don't start hearing voices out of nowhere at 37! There are different forms of v2k, but I normally get something that sounds like a "haunted walkie talkie" or a "tape recorder"; *very common during MK-ULTRA days.*
5. I am an Engineer by trade in one of the most lucrative industries: Information Technology. Due to the constant daily attacks I have been unable to work since 2019. At the time I was a Senior Engineer working on Medicaid.gov and have been in a government capacity for nearly a decade. I currently manage to get used to the nightly sleep deprivation but the bio effects attacks which mimic natural pain signals are hard to get used to. An example is a severe headache out of nowhere or stomach cramps with the v2k voices rubbing in the fact that I can't do anything!
6. I somehow have foreign implants in my body. I believe I actually have several non-consensual implants but this one in my hand is visible and non-refutable. Animals get implanted like this.

⁶ “Is Mind Control Possible? Absolutely. There is a mountain of evidence... ⁹ “Gas lighting is a form of persistent manipulation and brainwashing that causes the victim to doubt her or himself, and ultimately lose her or his own sense of perception, identity, and self-worth.”

STATEMENT OF INJURIES

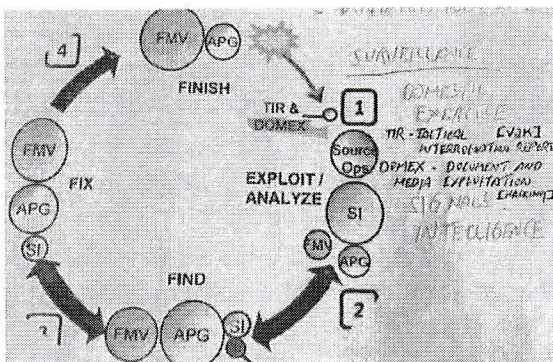

1. The hardest thing to comprehend is that people like this actually exist and most of this technology is NOT in the visible spectrum (radio waves and microwaves).
2. I believe I got targeted because my father honorably served in the Army. We didn't come from much, so I ended up enlisting in the Marine Corps for a shot at a brighter future. Poor military men are the easiest controlled test subjects since the military takes care of food, room, board, and controlled tests (active duty service). If you didn't enlist with the right occupation your chances of a brighter future are about even before you enlisted with that experience. I qualified for almost every military occupation but the one I was placed in had a 10-day training program.
3. The Business Model [page 6 diagram] is to first implant with some sort of tracker. With a security clearance you should expect to get monitored but NOT be subjected to remote "human experimentation". *You're not told but your references can get monitored as well and subjected.*
4. The concept of Controlled Effects [Containment on page 6 diagram] is to control a Target's entire environment and situation. I had a lot of friends before I enlisted but I don't fully understand why or how the technology was used on me and them to make people I considered friends to out of nowhere stop talking to me like I wronged them. Over the years this led to my current isolation [page 6 diagram cycle] and now daily attacks. *This would bother most people.*
5. Money is obviously an issue for most common people but due to my targeting I am probably one of the most educated controlled test subjects which makes me an even bigger target with my implants. Just the past 4 years alone I have lost at minimum \$3 million in the greatest bull market in history. My degree is in Finance and Economics and I have been trading for a good 20 years. With the hacking and constant daily attacks, it prevents me from buying and selling and focusing my attention on ANYTHING. Just in lost IT salary alone I lose at least \$1,000 a day.
6. I got out of the military in 2005 and I believe I have been targeted ever since. With my current level of understanding and interacting with other victims, everything I mention are common patterns: I have been sent to the hospital at least 3 times with direct energy and bio effects, loss of friends, *strange unexplained stupid occurrences*, about to be broke shortly since I can't work.
7. Since early 2019 I have been subjected to 1.5 years of daily 24/7 microwave v2k at the highest setting, 2 years of daily focused intense direct energy attacks with the occasional all day 24/7 for 3 weeks straight blitzes which are suicide attempts (during COVID lockdowns) multiple times (at least 5), still occurring daily sleep deprivation EVERY DAY FOR 4 YEARS (started waking me up every hour, then every 2 hours, now its every 3 – with 3 it is the hardest to fall back asleep and forced to stay awake and go through the day tired and sluggish), non-consensually implanted again at least 2 times that I know of, constantly hacking EVERYTHING, breaking in to my room, and car.
8. Beginning of 2022 they staged a car accident that sent my mother to the emergency room, a week or two later they attacked my elderly father and he was sent to the emergency room for around 3 weeks. This is the cause of my current isolation away from family and friends because they monitor and attack them if I am in the vicinity. *This is probably what gets most people.*
9. Enhanced Interrogation Techniques experienced with Direct Energy and Bio Effects and v2k:
beating, binding in contorted stress positions, subjection to deafening noise, sleep disruption, sleep deprivation, deprivation of food, prevented medical care (blocked communications and prevent me from working for medical insurance), waterboarding (wake up to intense induced acid reflux that suffocates me), sexual humiliation, subjection to extreme heat, confinement to small places (with no job I live in a small room)

THIS IS WHAT MOST TARGETED INDIVIDUALS BELIEVE

What is the REAL purpose of 24/7 MONITORING?

Why do SUICIDES happen during RENDITIONS?

THE FBI'S SECRET RULE [from The Intercept Series]

The FBI adopted the mantra that its job is to stop terror attacks before they occur, not just investigate them afterward.

Today's FBI is an intelligence agency without a historical peer in the United States

- Transformed itself from a criminal law enforcement agency into an intelligence gathering operation
 - Similar to the CIA and NSA
- Target community is mainly an immigrant one

Targeted not because of anything they have done, but merely because the bureau sees them as potential sources of intelligence on other members of their communities.

After a terrorist incident occurs, only then do analysts and law enforcement go into their vast data and focus on the perpetrator of the crime. This is exactly the reverse of what they should be doing. If the NSA wants to predict intentions and capabilities prior to the crime, then it must focus on known subversive relationships, giving decision-makers time to react and influence events.

- William Binney (NSA Whistleblower)

Whistleblowing [from Permanent Record by Edward Snowden]

On Constitution Day 2012, I picked up the document in earnest. I hadn't really read the whole thing in quite a few years, though I was glad to note that I still knew the preamble by heart. Now, however, I read through it in its entirety, from the Articles to the Amendments. I was surprised to be reminded that fully 50 percent of the Bill of Rights, the document's first ten amendments, were intended to make the job of law enforcement harder. The Fourth, Fifth, Sixth, Seventh, and Eighth Amendments were all deliberately, carefully designed to create inefficiencies and hamper the government's ability to exercise its power and conduct surveillance.

This is especially true of the Fourth, which protects people and their property from government scrutiny. The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no Warrants shall issue, but upon probable cause, supported by Oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

THINGS ACTUALLY GOT WORSE SINCE SNOWDEN!

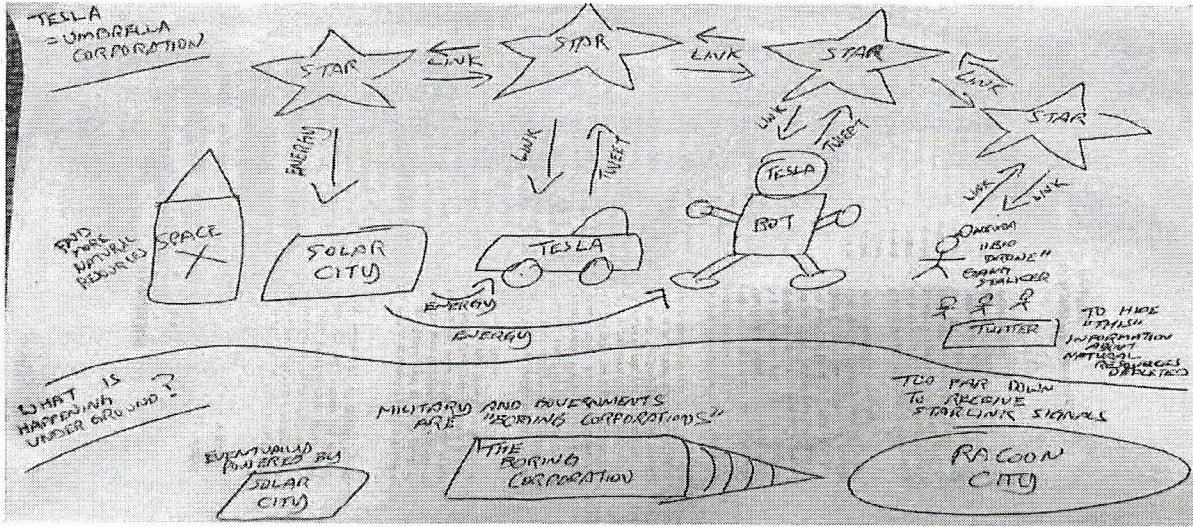

All of these people, whether they faced prison or not, encountered some sort of backlash, most often severe and derived from the very abuse that I'd just helped expose: surveillance. If ever they'd expressed anger in a private communication, they were "disgruntled". If they'd ever visited a psychiatrist or a psychologist, or just checked out books on related subjects from a library, they were "mentally unsound". If they'd been drunk even once, they were said to be alcoholics. If they'd have even one extramarital affair, they were said to be sexual deviants. Not a few lost their homes and were bankrupted. It's easier for an institution to tarnish a reputation than to substantially engage with principled dissent - for the IC, it's just a matter of consulting the files, amplifying the available evidence, and where no evidence exists, simply fabricating it. STATEMENT OF RELIEF

1. On 6/14/2022, the State of Pennsylvania had a civil action hearing: Human Free Will v. RCN & Service Electric (MJ-31101-CV-0000054-2022). I'm a Senior Engineer and the whole point was to get someone to get me off the private network I was paying for. With Electronic Warfare EVERY FORM OF COMMUNICATIONS will be denied in some form (hacking, jamming, and rerouting). I understand the technical aspects. I understand some of the science and techniques.
2. INVESTIGATE MY SITUATION. I have been going through this daily electronic harassment for over 4 years EVERY SINGLE DAY. I present my understanding of what I believe to be the TRUTH. There are so many others out there suffering for NO REASON. This is the basis for Neuro Rights and Bio Ethics. You shouldn't be able to monitor and keep someone in containment indefinitely!
3. THE GOAL IS TO TRAIN AND EDUCATE instead of ignoring as frivolous. *You might learn new and interesting things from PEOPLE NOT LIKE YOU. Each victim's story tells of the latest tradecraft.*
4. If you believe what I present is frivolous (even with my summaries and attached pictures) then EXPLAIN WHY instead of dismissing everything. In this 4-year window I have went to several police departments (most even refuse to file a report). I have gone to several FBI field offices and they ALL turn you away at the door. I'm paying this \$400 filing fee and losing out on my daily IT salary rate to tell my story. **MOST WILL NOT BE ABLE TO TAKE 4 YEARS OF THIS DAILY!**
5. Electronic Warfare has a red team (offensive) and blue team (defensive). There needs to be a basic level of local understanding of the tools to have BLUE TEAMS IN EVERY COMMUNITY. The red teams might NOT be American and are going unchecked in our community!
6. The way you get away with PLAUSIBLE DENIABILITY is to suicide the victims. The business is going to continue and adapt to changes. The military, government, and law enforcement have been resistant to change. Why? The red teams will continue to thrive until they are stopped.
7. There needs to be some way to count the statistics of "Targeted Individuals" or "mind control" victims. This needs to be a separate category to gather suicide data to see how there is a striking correlation with mass murders occurring more frequently lately. Fun fact: military, government, and law enforcement have higher rates of suicide (maybe there is a connection).
8. There needs to be a Safe Haven self-reporting mechanism. As a victim you are constantly getting attacked with full spectrum weapons. ANYONE that gets attacked daily will be uneasy and NOT NORMAL. With the involuntary confinement "mental health" laws this is a major deterrence to getting REAL help. The business is to either USE YOU or attack your reputation until you submit.
9. CHILDREN ALSO GET TARGETED. IF MORE GOOD PEOPLE KNEW THIS, THINGS WOULD CHANGE.

TARGETING HUMAN FREE WILL

There is a reason NO ONE LISTENS TO ANY TARGETED INDIVIDUAL and if you have been wronged the way we continually are wronged; you probably would give up by now. *I just want to start this discussion.*

As a victim all I can do is present what I know and depict it in a way that doesn't seem too far-fetched:

- Star Link is a constellation of 2,300+ (as of 9/2022) satellites that orbit the planet much closer to the Earth (at about 550km) with low latency data transmissions.
- The Boring Company is an infrastructure and tunnel construction services company. They have plans for an underground transportation company (LOOP), utility, and freight services.
- Solar City is basically a utility company that also sells battery backups.

In the early 1970's, in a climate not altogether unlike today's, the intelligence-gathering and surveillance activities of the NSA, the FBI, and the CIA came under public scrutiny. The Supreme Court struck down certain warrantless surveillance procedures that the government had argued were lawful as an exercise of the President's power to protect national security, remarking on "the inherent vagueness of the domestic security concept [and] the necessarily broad and continuing nature of intelligence gathering."

- The business will change and the environment variables; something will ALWAYS take its place
- Moscow Signal of 1953 is the exact same thing as Havana Syndrome of 2016 to the present
- After the revelations about MK-ULTRA and the MH-CHAOS operations, things just went DARK
- CIA v. SIMS proved nothing happens to ANY "human experimenters" (now contractors or corps.)

THE ROBOTS ARE HERE and thanks to MK-ULTRA people have been turning into drones for a while now

CONCLUSION

What I present is my current and FULL understanding of what a Targeted Individual is along with a concise history of "mind control" technology. It has been 4 long years and I continue to get attacked EVERY SINGLE DAY with full spectrum weapons. Given human nature, if people collectively don't attempt to stop these blatant human rights violations, it will ONLY GET WORSE because MK-ULTRA never really ended from the 1970's (just evolved with advances in neuroscience and now automation). Europe and the UN have already come to grips with these issues already. THERE IS A FAILED CHECKS AND BALANCES and just telling my story I hope to spread the scientific knowledge I continue to obtain.

I bring up the example of Tesla as an "Umbrella Corporation". The question I pose is: What are these corporations really up to? Do they give back to society or are they building some sort of "Babylon Kingdom"? This is where Information Warfare and Electronic Warfare come in. Here is a basic logic question: if "mind control" technology exists AND "mental health" issues are rising THEN who benefits? There really needs to be a BALANCE and there is a COMMUNITY who has never given back making decisions for other people. Human interest is not just about money or the bottom line or even winning.

The focus here is on Electronic Warfare and in my case the ONLY THING I can prove is I keep getting ALL my electronic devices hacked. I am trying to compel the court for an INVESTIGATION into my situation. The goal is to TRAIN AND EDUCATE on the scientific knowledge I have obtained on the public information of "mind control" and associated history of electricity (humans run on electrical signals) and anything electrical can be hacked! EVERY CASE on this topic has been thrown out as frivolous and just this fact alone should raise some questions. With the proper gathering of statistics and some compassion on the part of LOCAL, STATE, and GOVERNMENT entities, the issue of Neuro Rights (remote neural monitoring) and Bio Ethics (remote pain signals) can be fully addressed. This is the true definition of being "woke".
